

# HOW TO MAKE A BOT

sketch paper

dominoes

SHARPIE  
paint pens

foam  
paintbrush

polyurethane

your  
imagination

## Step 1: REFLECT

Think about who you want to give your Bot to and what kind of Bot they could use?

## Step 2: SKETCH

Once you know who will receive your Bot and what kind, sketch out what you want your Bot to look like.

Next, prime your pens (tap down on the tips gently on scrap paper, when you see ink flow into the tip you are good to go).

## Step 3: MAKE

Start drawing your Bot on your domino.

One recommendation is to start with light colors first, letting each color dry, add darker colors, white highlights, then finish off with final black details.

**DON'T FORGET** to flip your domino on its edge to sign your piece of original art.

## Step 4: PROTECT

Using the foam brush, apply a thick, even polyurethane coat to seal your design. Let dry (about 4 hours).

## Step 5: GIVE

Give your Bot to the recipient. Maybe include a little note as to what the Bot is, what it does, and why do made it for them. Make a plan to get your Bot to its new home by delivering your gift box in person or in the mail.
